

Answer all questions and objections as they relate to said certain Science and Laws. Application 60/644,724 shows how we were able to split each energy molecule, as the energy was re-cycled, making two molecule from one, thereby increasing energy within the system without need for any new outside energy to keep the system in operation.

Referring to Application Control Number: 10/811,382, and in particular to FIGS. 1A & 1B, drawing clearly shows the splitting of the energy molecule by employing two 12-volt alternators, each charging a separate battery one at a time, controlled by an energy molecule splitting device.

As such and in light of the explanation given in CO-pending Application Control Number 60/644,725, all of the Scientific objections in subject Office Action mailed 11/22/2004, it is shown that in fact the said certain scientific Laws were not broken but instead an exception was made that conforms to the said certain scientific Laws, and also established a new Scientific Law of the Perpetual Motion Machine.

REMARKS—GENERAL

By the above explanation and referenced CO-pending Application the scientific objections are addressed properly and appropriately and distinctly in order to define the subject invention more clearly, and to overcome the technical objections of operability and to place the said subject application

Appn Number: 10811382 (Bailey et al.) GAO 2034 Answer continued Page 3.

In full compliance for patentably which action Prose applicant request.

Conclusion

For all of the above reasons, applicant submits that the claims are in proper form, and define patentably over the sighted prior art. Therefore we submit that this application is now in condition for allowance, which action w respectfully solicit.

Very truly yours

Rudolph V. Bailey Sr./D.B.A. JESUS & Bailey International Foundation
